

iVario

Installation solutions.

An answer to every challenge.

Is your kitchen a bit different?

The iVario will adapt.

One-off modular system

Do you want to replace one of your units or plan a whole new kitchen?

Whatever you may be planning, thanks to its modular concept, the iVario will fit in with your ideas and your kitchen. Integrated into a kitchen suite, on a plinth or on the wall - the iVario is extremely flexible.

Just in case you change your mind the installation options can be retrofitted.

1 The base unit

The iVario has a compact design meaning that it only takes up minimal space while still delivering maximum output.

You can, for example, simply install it on existing kitchen cabinets, such as a holding cabinet, a refrigerated counter, a worktop or in a kitchen suite. This allows you to make the best use of the space underneath the cooking system.

2 As a floor unit

Installed on a stand (A) or a substructure (B), the iVario has the installation height you need.

You can combine the stand or a substructure with plastic feet or stainless steel feet. This means the cooking system is even suitable for use at sea. And if you prefer to use the cooking system as a mobile unit, simply use the castors option.

3 With electric height adjustment

The iVario Pro moves 200mm in 16 seconds, the height adjustment moves and adapts to the operators individual requirements for working at a height suitable to them.

This provides safety and ergonomic requirements.

Adjustment range: +175/-25 mm compared to the standard height. No separate electric connection necessary, controlled from the iVario display. Flexible drain hose included.

4 On an existing plinth*

By placing the iVario on a plinth, you will no longer need to worry about cleaning underneath the cooking system.

The iVario with its stand or substructure can easily be mounted onto an existing plinth without any additional installation accessories.

*Minimum plinth depth 650 mm

5 Wall mounting

Easier to keep clean, more leg room - this can be done with the wall mounting kit. Quick and easy to mount.
