

HOSHIZAKI

Flake & Cubelet

Ice Machine

The FM series produce flake/nugget ice, with the nugget ice compressed during production to make it long lasting. The flake and nugget ice is popular for a variety of cooling purposes including the display of fish and fresh produce, and also in the medical world for cooling blood and organs.

Carbon Auger bearings are used within this range and they are far more robust than roller bearings, enhancing product life expectancy and also reducing maintenance costs.

The characteristics of the ice produced by Hoshizaki ice makers means that 'freeze-burn' is no longer an issue when displaying fresh fish or produce.

Cubelet Ice Dispenser

The DCM-60KE and DCM-120KE are ice / water dispensers which can produce cubelet ice, cubelet ice and water or dispense only water. It is ideal for a self-serving and multi environments including hospitality, catering, leisure and healthcare.

Key Features:

- ✓ Includes lever and LED operation buttons, simple push button to dispense ice.
- ✓ Adjustable portion control to reduce energy consumption and wastage
- ✓ Auger system brings water consumption equal to ice-production
- ✓ Direct dispensing reduce risk of contamination
- ✓ Easy to remove and clean
- ✓ Compact and space saving
